

Importance of Computer and ICT in teaching learning

Guide and counseling programme was organized for B.Ed. trainees session 2020 - 22 on dated 24th June 2022 at Vijay Memorial College of Education in multiple purpose hall. The theme of the guide and counseling programme is "**Importance of Computer and ICT in Teaching Learning Process**". Mrs Deeksha Sharma Assistant Professor in Computer Science Department invited as a Resource Person. She provided a valuable knowledge and information about ICT and computer field. Assistant Professor Mrs. Deeksha Sharma informed and explained that in recent years there has been how can best harnessed to improve the efficiency and effectiveness of education at all levels. ICT emerge as a potentially powerful enabling tool for educational changes and reforms in 21st century as the world is moving rapidly towards digitalization such as e - governance, e - health and e - education etc.

ICT is the most effective way to boost student's knowledge and the role of ICT in education sector becoming more important. Professor Deeksha guide our B.Ed. trainees after completed their training you can pursuing to start your career because computer is one of the major subject in modern technology age.

It's also one of the most far-reaching courses that can provide rewarding job opportunities. India has one of the world fastest-growing IT industries. Computer courses are designed to teach students the fundamentals of computers. Computer courses include cyber security, web design, PGDCA etc. These computer courses can be made more exciting and professional. They help us advance one's career and contribute to one's professional growth and development.

At the end of the session students raised some questions or queries from Professor Deeksha and she satisfied our B.Ed. trainees with her answers. That was too impressive, valuable and knowledgeable session for trainees.
